DETAILED ACTION

Drawings

Figures 1-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Siegel et al.

In figure 2 Siegel et al illustrates a laser driving circuit for transmitting data burst. The driving circuit has a pre-bias gating signal (196), a current bias (I_b) and a current modulation (I_m), which will provide the pulse current. The driving circuit provides a thermistor (198) for temperature compensation of the laser diode and a monitor diode (164) for feedback of the laser diode.
